AUTERRA

Follow these steps to get started with your Dyno-Scan™ for Palm OS®

Step 1
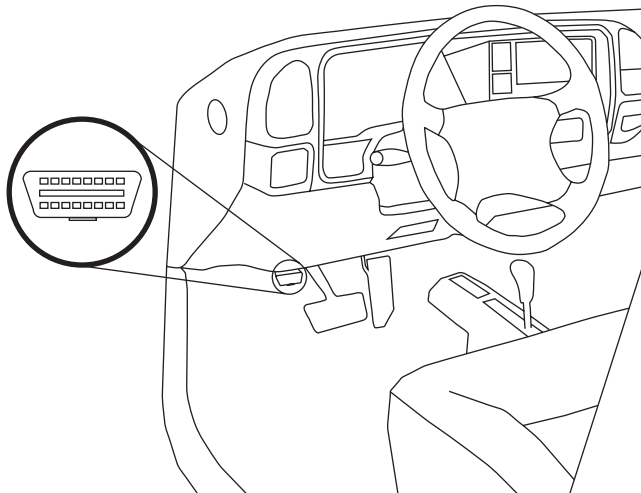

Install software onto your Palm handheld

- Put the Dyno-Scan™ CD in your computer.
- Start the Palm Desktop Software that came with your Palm handheld.
- Click the 'Quick Install' button on the Palm Desktop Software and add Dyno-Scan.prc, MathLib.prc, and all the pdb files (i.e. Generic.pdb, Ford.pdb, ...) located on the Dyno-Scan™ CD. The button is simply labeled 'Install' on Palm Desktop Software versions prior to 4.1.
- HotSync® your Palm handheld.

Step 2

Connect your Dyno-Scan™ to the Palm handheld

A Plug the HotSync® cable into the Palm handheld.

B Connect the HotSync® cable to the OBD II adapter and tighten the two thumb screws.

C Connect the OBD II cable to the OBD II adapter and tighten the two thumb screws.
